Mr. Aykut KIRBAS
TSE Secretary General,
Turkish Standard Institution
Necatibey Cad. No:112 06100 Bakanlıklar/ANKARA
TURKEY

Dear Sir,

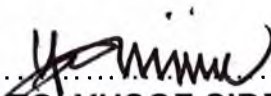

TURKISH STANDARD INSTITUTION (TSE) ACCREDITATION

With reference to your letter ref.52088513-724.01.03.00-E.170937 dated 02 July 2019 dan visit by your delegation on the same date referred.

2. On behalf of the Director General, and based on your presentation and further assessment on documentation submitted, we hereby confirmed TSE accreditation with Fire & Rescue Department Malaysia (FRDM).

3. Any registered local/foreign company may use the TSE test reports for their approval on passive or active fire protection systems as both reports and certifications are now recognised in Malaysia.

Yours sincerely,

.....
(DATU YUSOF SIDEK)

Director,
Planning and Research Division,

Dear Mr. Wahid;

Turkish Standards Institution (TSE) presents its compliments to the esteemed Fire and Rescue Department of Malaysia (BOMBA).

As is known, TSE is the sole standardization body in Turkey which operates also in diverse fields of quality infrastructure that includes certification, testing, training as well as surveillance and inspection activities globally in accordance with international accreditation standards.

In that respect, TSE and BOMBA officials held a meeting on 2nd July, 2019 at BOMBA premises in order to introduce both sides' activity areas and to discuss potential cooperation areas.

Besides, acceptance of TSE test reports and certificates given for the export products in the field of fire safety was another and primary discussion area between both sides. Taking into consideration the request of our manufacturers and exporters from TSE to initiate cooperation with esteemed BOMBA, TSE application file which includes related documents (accreditation scopes, qualification matrix of testing personnel, organizational profile etc.) was prepared and submitted to lay out TSE laboratories' capabilities.

In this framework, we would like to have TSE application file being reviewed by esteemed BOMBA side in order for TSE reports & certificates' given for export products to be accepted by BOMBA.

As per discussions in the meeting, TSE is also ready to share its experience with BOMBA in needed areas including but not limited to establish a calibration laboratory according to ISO/IEC 17025 "General Requirements for the Competence of Testing and Calibration Laboratories" accreditation infrastructure and ISO/IEC 14001 "Environmental Management Systems - Requirements with Guidance for Use" certification services.

Awaiting your reply, Turkish Standards Institution avails itself of this opportunity to renew the esteemed Fire and Rescue Department of Malaysia (BOMBA) the assurances of its highest consideration.

Yours sincerely,

Aykut KIRBA
Aykut KIRBA
TSE Secretary General
